	Examiner Louis M. Arana	Art Unit 2859	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to because all rectangular boxes in Fig.1-5 should be labeled with a legend such as "cell ", "diode" etc. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 102***

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Art Unit: 2859

2. Claims 1-82 rejected under 35 U.S.C. 102(a) as being anticipated by Allred et al. in the article "High sensitivity Atomic Magnetometer Unaffected by Spin-Exchange Relaxation" Physical Review Letters.

Allred discloses a magnetometer as shown in Fig. 1. Applicant is believed to be intimately familiar with the contents of this prior art reference. The magnetometer uses a potassium-sensing cell with a buffer gas. Also provided are the pump beam and probe beam as well as field coils that generate a magnetic field of 50-200 micro-Gauss. The cell is surrounded by magnetic shields. The sensitivity of the magnetometer is limited according to the article, by the performance of the shields. The sensitivity can be improved by use of superconductive shields. Allred meets all the limitations of the claims at issue in their present form, including the limitations pertaining to the first and second predetermined values.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

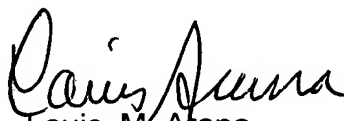

Art Unit: 2859

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Chase, Holt and Lam et al disclose optically pumped magnetometers and related devices. Note the abstract of each of the disclosures. Note particularly the structure of Lam's apparatus as described in connection with Fig. 1.
